

Assignment No. 1: Website Analysis Report

Case study: Before coding of the website, planning is important, students should visit different websites (Min. 5) for the different client projects and note down the evaluation results for these websites, either good website or bad website in following format.

Abstract

This case study evaluates five different websites from unique domains to analyze their design, usability, performance, and functionality. The selected websites belong to the search engine, e-commerce, education, government service, and creative portfolio domains. Each website is studied to identify good design practices and major drawbacks. The main purpose of this case study is to understand important planning considerations before developing a website.

Keywords: Website Evaluation, Web Design, Usability, User Experience, Accessibility, Performance

1. Introduction

In today's digital world, websites act as the primary medium of communication between organizations and users. Whether it is a government service portal, an educational platform, a corporate website, or a healthcare system, a website's design directly impacts how users perceive and interact with an organization. Before writing a single line of code, it is essential to carefully plan the structure, objectives, content flow, and technical requirements of a website.

Poor planning can result in slow performance, confusing navigation, poor accessibility, and low user engagement. On the other hand, well-planned websites are faster, easier to use, accessible to a wider audience, and more successful in achieving their purpose. Website planning includes identifying the target audience, defining the website's goals, designing information architecture, choosing suitable technologies, and considering usability, security, and scalability.

This case study focuses on evaluating real-world websites from different professional domains such as government, education, agriculture, automobile industry, and healthcare. By analyzing both strengths and weaknesses of these websites, students can understand how different design choices influence user experience. This study helps build practical knowledge that will guide students in developing effective, user-friendly, and technically sound websites in future projects.

2. Objective

The objectives of this case study are:

- To study websites from multiple professional domains
- To understand real-world website design practices
- To analyze usability, performance, and responsiveness
- To identify common design problems and best practices
- To learn important planning considerations before website development

3. Methodology

Each website was evaluated based on the following parameters:

- Website purpose and content structure
- Visual design and readability
- Navigation and usability
- Loading speed and performance
- Mobile responsiveness
- Accessibility and clarity of information

4. Case Study Evaluations

4.1 Case Study 1 – India.gov.in

Website: <https://www.india.gov.in>

Domain: Government Portal

India.gov.in is the national portal of India that provides information and access to various government services.

Things Liked:

- Authentic government information
- Multiple government services in one place
- Multilingual support

- Wide coverage of schemes and departments

Things Disliked:

- Slow loading pages
- Complex navigation structure
- Outdated visual design
- Difficult to use on mobile devices

Overall Evaluation: Average Website

The website is information-rich but needs major improvements in usability, speed, and mobile responsiveness.

4.2 Case Study 2 – NPTEL

Website: <https://www.nptel.ac.in>

Domain: Education

NPTEL provides free online courses from IITs and IISc for engineering and science students.

Things Liked:

- High-quality educational content
- Free certification courses
- Well-structured subject categories
- Trusted academic source

Things Disliked:

- Old-fashioned interface
- Confusing course navigation
- Heavy video content slows pages

Overall Evaluation: Good Website

NPTEL is academically strong but requires UI and performance improvements.

4.3 Case Study 3 – Krishi Jagra

Website: <https://www.krishijagran.com>

Domain: Agriculture

Krishi Jagran focuses on agricultural news, farming techniques, and rural development.

Things Liked:

- Practical farming information
- Regional language support
- Agriculture-focused content
- News updates and advisories

Things Disliked:

- Too many advertisements
- Cluttered layout
- Inconsistent content formatting

Overall Evaluation: Average Website

The website is informative but visually cluttered and distracting.

4.4 Case Study 4 – Tata Motors

Website: <https://www.tatamotors.com>

Domain: Automobile / Corporate

Tata Motors is a corporate website showcasing vehicles, innovations, and company information.

Things Liked:

- Professional and modern design
- High-quality visuals
- Clear product categories
- Investor and sustainability sections

Things Disliked:

- Heavy multimedia slows load time
- Too many animations
- Limited accessibility features

Overall Evaluation: Good Website

The website strongly reflects the brand but should improve performance and accessibility.

4.5 Case Study 5 – Apollo Hospitals

Website: <https://www.apollohospitals.com>

Domain: Healthcare

Apollo Hospitals' website provides hospital services, appointment booking, and health information.

Things Liked:

- Online doctor appointments
- Clear service information
- Emergency support features
- Mobile-friendly design

Things Disliked:

- Homepage overcrowded
- Pop-ups distract users
- Navigation can be improved

Overall Evaluation: Good Website

Apollo Hospitals provides useful healthcare services online but should simplify its interface.

4.6 Case Study 6 – Wikipedia

Website: <https://www.wikipedia.org>

Domain: Education / Knowledge

Wikipedia is a free online encyclopedia focused on providing information to everyone.

Things Liked:

- Free and open educational resource
- Fast loading pages
- Simple and consistent layout
- Multilingual content

- Easy navigation

Things Disliked:

- Outdated visual design
- Some articles may not be fully reliable
- Limited interactive features

Overall Evaluation: Good Website

Wikipedia successfully delivers knowledge but could improve its design and credibility systems.

4.7 Case Study 7 – IRCTC

Website: <https://www.irctc.co.in>

Domain: Government / Public Service

IRCTC is the official Indian railway ticket booking portal.

Things Liked:

- Online ticket booking facility
- Real-time train updates
- Nationwide service
- Mobile application support

Things Disliked:

- Slow during peak hours
- Complex and confusing interface
- Frequent session timeouts

Overall Evaluation: Average Website

IRCTC is functionally important but needs major improvement in usability and performance.

5. Final Evaluation Table

Sr No	Website URL	Purpose of Website	Things Liked	Things Disliked	Overall Evaluation
1	https://www.india.gov.in	Government services & information portal	Authentic info, many services in one place, multilingual support, official links	Slow loading, complex navigation, outdated design	Average Website
2	https://www.nptel.ac.in	Online courses & engineering education	Free IIT courses, quality content, certification, wide subjects	Old UI, confusing navigation, slow video loading	Good Website
3	https://www.krishijagran.com	Farming news & agricultural guidance	Practical farming info, regional language support, Agri updates	Too many ads, cluttered layout, inconsistent formatting	Average Website
4	https://www.tatamotors.com	Corporate & product showcase	Modern professional design, product details, innovation info, branding	Heavy animations, slow on low internet, complex menus	Good Website
5	https://www.apollohospitals.com	Hospital services & appointment system	Online booking, doctor search, emergency info, mobile-friendly	Homepage overcrowded, pop-ups, navigation can improve	Good Website
6	https://www.wikipedia.org	Free online education & knowledge	Fast loading, multilingual, simple layout, huge information base	Outdated design, reliability issues in some articles	Good Website
7	https://www.irctc.co.in	Government railway ticket booking service	Online ticket booking, nationwide service, payment integration	Very slow sometimes, server errors, confusing UI	Average Website

6. Learning Outcomes

- Good planning improves usability and clarity
- Performance strongly affects user satisfaction
- Mobile-friendly design is essential
- Information structure decides ease of use
- Accessibility must be included from planning stage
- Balance between design and functionality is necessary

7. Conclusion

This case study highlights the importance of website planning before development. By evaluating websites from different domains, it is observed that even popular websites face usability and performance challenges. A successful website must focus on user needs, clear navigation, fast performance, accessibility, and responsive design. These observations provide valuable guidance for students before designing and developing their own websites.
